This innovative IP65 Front Capacitive Touchscreen PC with its silent fanless operation, high reliability, and fine craftsmanship, stands out from the competition. The Touchscreen PC features a sleek modern appearance. Flat edge to edge glass with a patented silicone rubberized seal ensures the front panel is water proof and dust proof meeting the requirements of IP65 standards. The back has a sturdy aluminum case manufactured out of a continuous casting mold with stable VESA-100 fixation bolts offering numerous industrial and consumer connectors like four serial ports, eight GPIOs or USB 3.0. The heart of the Touchscreen PC is an industrial mainboard with the powerful but fanlessly cooled Intel Celeron J1900 QuadCore processor with up to 2.42GHz Core speed, equipped out of the box with 4 GB of RAM and a 64GB SSD Drive running Linux. The Intel's HD Graphic chipset, supporting FullHD, DirectX 11.1 and OpenGL 4.0 makes the system ready for eyepopping graphic displays. The capacitive touch panel is completely inhouse developed by renowned engineers. Anti Glare chemically etched surface treatment, 10-finger multitouch and unlimited touches without failure on the touch panel are class leading features. Behind that touch panel are A+ panels, guaranteeing that there is not even a single sub-pixel defect. As an option, customers can chose optical bonding and high brightness panels to further improve the visual impression of the product. These industrial touch PCs ensure the performance and stability required for long term operation in today's demanding manufacturing, industrial, commercial, and retail environments
