gallons distributed to date

50%

households previously buying clean water at higher prices

\$624

savings per year per family (local currency)

1

job created (part-time)

### Economic Benefits

## Spiritual Impact

As this project in San Lorenzo continues to distribute more water and host more Health & Hygiene Classes, it also continues to support the growth of the local church's outreach activities.

**We believe people THRIVE when their physical and spiritual needs are MET.**

While always selling water at a price that is affordable for every single member of the community, this project that you generously invested in continues to generate a profit that allows the church to serve the community in a variety of other ways. Thank you for believing in the transformational power that affordable safe water can have!

## Health & Hygiene Impact

51

kids participated in H&H Program

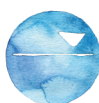

8

women participated in H&H Program

### Global Impact

We continue to implement safe water projects in the hard to reach areas of the Dominican Republic, Guatemala, Haiti, and Mexico. Thank you for helping us end the Global Water Crisis!
