**NOTIFICATION OF DELIVERY AND
QUALITY PERFORMANCE RATING**

Hi ! I am Vernon Lermond. I was just wondering on the status of my recent order for an HC11 board. Also in case you are interested I have a link below to one of the principal products I put these boards in. Just in case your customers would like a rags to riches story ... I went from a \$28 per hour tech using other peoples test equipment to a gentleman of leisure who now works about 60 hours a month for more income ! All because I used your HC11 board ! Only in America, only with EMAC. I can do commercials too.
