

SD Flash Cards

SD/MMC (Secure Digital / Multi-Media Card) is fast becoming the new standard in Embedded Storage. Small size, highly rugged and fast read/write times make this the ideal flash format.

Small Size (24mm x 32mm)

High Storage Capacity (SDHC)

High performance

Can use 4-bit SD or SPI access modes

Full boot capability

Automatic wear leveling

Hot Swappable

Cost effective solution

Low power consumption

Compatible with all of EMAC boards using a SD/MMC Socket

Compatible with all Embedded Operating Systems such as EMAC Linux/Real Time Linux, DOS, WinCE, and XP Embedded.
